

JANHAVI KOLEKAR

AI / ML Engineer • GenAI & LLM Applications

Belagavi, Karnataka | +91 91411 25163 | janhavikolekar280@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

AI Engineer with hands-on experience building and shipping end-to-end Generative AI products — from RAG pipelines and multi-agent workflows to production-ready, user-facing applications. Proven track record delivering measurable impact using Claude, Gemini, OpenAI, and LangChain, with strong fundamentals in Python, prompt engineering, vector retrieval, and LLM evaluation. Comfortable owning the full lifecycle: research, prototyping, deployment, and iteration.

TECHNICAL SKILLS

Languages: Python (OOP, Web Scraping), SQL, Bash

GenAI & LLMs: LangGraph, LangChain, Agentic AI, RAG, Vector Embeddings (FAISS), Tool Calling, Multi-Agent Workflows, Prompt Engineering (CoT, Few-Shot, ReAct), Fine-Tuning, LLM Evaluation, Hugging Face

ML & Deep Learning: TensorFlow, PyTorch, Keras, ONNX, NLP, LSTM, Time Series Forecasting, Sequential Modeling, Model Training

Data & Analytics: Pandas, NumPy, Matplotlib, Data Visualization, BeautifulSoup, SerpAPI

Engineering & DevOps: FastAPI, REST APIs, Flask, Streamlit, Docker, Git/GitHub, OpenSSL, WSL/Linux

Tools: Jupyter, VS Code, MATLAB, Excel

EXPERIENCE

AI/ML Engineer Intern — A2gent

Nov 2025 – Present

Remote

- Designed and shipped multi-agent workflows on Claude, Gemini, and LangChain APIs leveraging chain-of-thought, tool-use, and few-shot prompting for finance-domain automation — reducing analyst task completion time by ~30%.
- Engineered web scraping pipelines with BeautifulSoup and SerpAPI to ingest live financial data into LLM workflows, serving 50+ structured financial queries daily and deployed end-to-end on Streamlit Cloud.
- Led Git-based collaboration across a 4-member team (branching, PRs, merges, conflict resolution), maintaining version-control discipline and enabling continuous deployment across a shared codebase.

AI & Computer Vision Intern — Swatah.ai

Jan 2025 – May 2025

Pune, India

- Implemented usage-based monetization for ONNX models on edge devices using Flask and OpenSSL, enabling RSA-signed model execution and real-time inference billing across 10+ test devices.
- Built production-grade dev environments on WSL/Linux and authored shell automation scripts that cut model deployment time by 40%.
- Documented end-to-end workflows covering model execution, inference tracking, and billing — improving onboarding for new engineers.

PROJECTS

Financial Deep Research Agent | LangGraph · LangChain · OpenAI/Gemini · FastAPI · FAISS · SerpAPI | [GitHub](#)

- Built an autonomous Financial Deep Research Agent using LangGraph and LLM tool-calling to perform multi-step company research, market intelligence gathering, financial analysis, and source-cited report generation.
- Engineered an end-to-end research pipeline integrating web search, document retrieval, vector embeddings, and LLM reasoning to synthesize information from multiple sources into structured investment-grade reports with reduced hallucinations.

Finance PPT Maker | Python-pptx · Streamlit · SerpAPI · OpenAI / Gemini / Claude | [GitHub](#)

- Built an AI-powered Finance Presentation Generator with multi-LLM support (OpenAI, Gemini, Anthropic) that auto-creates finance slide decks with interactive charts and live market data in under 10 minutes — reducing manual report creation time by ~80%.
- Integrated SerpAPI-driven financial data ingestion with domain-specific templates, automating end-to-end report creation across 5+ financial use cases.

RAG-CHAT — Research Agent | LangChain · FAISS · Streamlit · Google Gemini · SerpAPI | [GitHub](#)

- Built a Retrieval-Augmented Generation agent using Google Gemini, FAISS, and Sentence Transformer embeddings to retrieve semantically relevant chunks from PDFs and the web — producing source-cited, hallucination-reduced responses with ~85% user satisfaction in testing.
- Engineered a hybrid retrieval pipeline combining PDF ingestion (PyPDF2) with SerpAPI/BeautifulSoup web scraping, enabling multi-source context aggregation and real-time summarization across 20+ document types.

EDUCATION

B.E. in Electronics & Communication Engineering

Nov 2021 – Jun 2025

Jain College of Engineering and Research, Belagavi • CGPA: 8.62 / 10

CERTIFICATIONS

- **AWS Cloud Practitioner Essentials** — Amazon Web Services, 2025
- **Data Analytics with Python** — NPTEL, 2024
- **Python Programming** — GUVI, 2022
